SAEM 2026 ACCEPTED ABSTRACT · ED OPERATIONS & THROUGHPUT

Turning Clicks into Competition: Incentivizing Consult Documentation to Optimize Patient Throughput

Zoe Kitchings, MD — PGY-3, UVA EM · **Faculty Mentors:** Sarah Wendel, MD & Timothy A. Layng, DO · Site: UVA EM

RESEARCH QUESTION *Can a low-cost gamified leaderboard surfacing per-resident consult-documentation completion rates accelerate consult notes — and, in turn, move ED throughput?*

1 CONTEXT · WHY THIS MATTERS

Consult workflows are a known throughput bottleneck, and consult notes

2 METHODS

Pre/post quasi-experimental QI evaluation. 12-week pre-period vs. 12-

service line where note completion gates disposition.

→ Which other note types (admit, observation, discharge) we think this could port to.

Come say hi — happy to walk you through the dashboard.

FUNDING
No external funding. QI initiative within UVA EM.

CO-AUTHORS
Kitchings Z, Wendel S, Layng TA, [co-authors TBD]

IRB
UVA IRB-HSR QI exempt — non-research determination
